PROFILE

Jr. Web Developer with a strong creative background. Experienced in full-stack web development including project planning. Great troubleshooter, complex problem solver and teammate.

SKILLS

JavaScript, CSS3, HTML5, JQuery, ReactJS, NodeJS, SQL, Git / GitHub, Web Development Lifecycle, Restful API Development, MVC Framework, Agile Development, Web Hosting, Adobe Premiere and Photoshop.

PROJECTS

Watch Something presents a user with three movies per search based on their choice of decade and genre. Movie choices are linked to Amazon Video where a user can digitally rent, buy or watch on Amazon Prime.

Tech Used: The Movie DB API, Amazon Product API, Node/ExpressJS, ReactJS, PostgreSQL and hosted on Heroku.

Memedr Memedr is an app that brings people together based on their choice of memes. When users pick the same favorite meme they are connected with each other.

Tech Used: imgflip API, Node/ExpressJS, React, PostgreSQL and hosted on Heroku.

Existence is Pain A classic style arcade game inspired by the cartoon "Rick and Morty". The Meeseeks are angry. Get as many before the time runs out. Miss and they'll take down your score.

Tech used: JavaScript, JQuery, HTML5, CSS3 and hosted on Git Pages.
