PROFILE

I've always loved three things - pizza, coffee and computers. So naturally, I thought I would make for a great Web Developer. I have a diverse background that includes Academic, Entertainment and Medical experience so I'm used to taking on a diverse set of tasks. I've had a lot of experience with people from very different backgrounds which has made me a good mediator and can help people manage their differences while working in a group and staying productive.

SKILLS

CSS 3, HTML 5, JavaScript, ReactJS, NodeJS, ExpressJS, PostgreSQL, Git, Heroku. Adobe Premiere and Photoshop.

PROJECTS

Watch Something - Watch Something presents a user with three movies per search based on their choice of decade and genre. Movie choices are linked to Amazon Video where a user can digitally rent, buy or watch on Amazon Prime if available.
Tech Used: The Movie DB API, Amazon Product API, Node/ExpressJS, ReactJS, PostgreSQL and hosted on Heroku.

Memedr - Memedr is a app that brings people together based on their choice of memes. When users pick the same favorite meme they are provided with each others contact information.
Tech Used: imgflip API, Node/ExpressJS, React, PostgreSQL and hosted on Heroku.

EXPERIENCE

General Assembly | Web Development Immersive   2017
50 - 60 hours per week in web development training.
